linkedin.com/in/abdulkareem-alhallak-46a09b298

Software developer focused on web, mobile, backend, database, and deployment-ready business systems. I build practical products with clear business logic, reliable APIs, and simple user experiences.

CORE SKILLS

Frontend & Mobile

React, Next.js, JavaScript, Tailwind CSS, Flutter, Dart

Backend & Database

Laravel, Node.js, Express, REST APIs, MySQL, PostgreSQL, SQLite

Systems

Authentication, authorization, business logic, admin workflows

Tools

Docker, Linux, Git/GitHub, Nginx, Cloudflare, Postman

FEATURED PROJECTS

Tabeley - Restaurant & Cafe Booking Platform

Mobile-first reservation platform for restaurants and cafes with customer, vendor, and admin flows.

- Reservation lifecycle, table assignment, approval/rejection, offers, and rules.
- Built with Flutter, Riverpod, Laravel, Sanctum, PostgreSQL, Docker, and REST APIs.

Physio Center Management System

Clinic operations system for patient records, appointments, queue, visits, invoices, reports, backup logs, and LAN-ready usage.

- Flutter desktop client with Laravel API contract and PostgreSQL data model.
- Focused on daily clinic workflows, reliability, and local deployment.

Acadia E-commerce Website

Full-stack e-commerce MVP with storefront, product management, authentication, uploads, cart flow, and admin API.

- Built with React, Vite, Tailwind CSS, Express, Prisma, JWT, Multer, and Zod.

ACADEMIC & TRAINING PROJECTS

Image Editor Desktop App

C# WinForms image editor with filters, crop, rotate, text, and undo/redo.

Physio Center Node API

Backend prototype using Node.js, Express, Sequelize, SQL Server, and JWT.

Simple HTTP Web Server

Python socket server handling GET, POST, static files, and uploads.

Data Mining Notebook

Classification, regression, and clustering with Python and scikit-learn.
